Role: Full Stack Developer

Reference: HSL/FSD/29062018

Salary: Salary Range - Gross per annum: £35,000 - £55,000

Posting Date: 29/06/2018

Introduction

Haran Solutions Limited is one of UK's rapidly growing business consulting companies specialising in providing consulting and business solutions to industry and public sector across UK.

Currently we are looking for TWO Full Stack Developers to help design, develop and test high-quality and innovative web based software solutions.

Key Responsibilities

- Writing well designed, testable and efficient code
- Develop and update templates, functionality and applications
- Working within cross-skilled, agile teams, developing maintainable, efficient web applications
- Estimating tasks and contributing to project planning exercises
- To manage tasks effectively and accurately track and report on work status
- Investigating and embracing new technologies and languages
- Continuously improving best practices, standards, and processes to deliver high quality software solutions
- Troubleshooting and bug fixing

Essential Experience

- Strong skills in Advanced Java and Spring technologies
- Strong skills in developing Microservices with Spring Boot plus experience of NodeJS framework
- Experienced in developing web based applications using ReactJS or AngularJS frameworks
- Well versed in HTML5, CSS3, Bootstrap and other front-end technologies
- Well versed in RDBMS such as Oracle and MySQL
- Knowledge of SOA and Microservices
- Exposure to NoSQL databases such as MongoDB and Cassandra is advantage
- Excellent Technical Documentation skills
- Knowledge of common software development and architectural patterns
- Understands all aspects of the software development life cycle and associated execution models (e.g. Waterfall, Agile, Iterative Development)
- Ability to adapt to new technologies, and in improving the existing processes

Desired Experience

- Agile, full stack development experience covering primarily either ReactJS/MEAN frameworks for UI and/or NodeJS framework for microservices development
- Dev-ops experience and development automation
- Unit and functional test automation and delivery
- Ability to learn and adapt to new software architectures

Skill Sets Required

- Strong skills in Advanced Java and Spring technologies
- Strong skills in developing Microservices with Spring Boot plus experience of NodeJS framework
- Experienced in developing web based applications using ReactJS or AngularJS frameworks
- Proficient in creating responsive HTML utilising JavaScript and CSS, Bootstrap and other front-end technologies
- Agile Development Process experience, ideally SCRUM
- Well versed in RDBMS such as Oracle and MySQL
- Proficient in test driven development / unit testing using tools
- Exposure to NoSQL databases such as MongoDB and Cassandra
- Proven ability to form effective working relationships with key customers, stakeholders and colleagues within a complex management structure

Education Level / Qualifications

- Bachelor's Degree in computer science or other related degree.
- Master's degree - Preferred

Travel - Occasionally within UK
