Reference: HSL/SDSP/27032017

Salary: Salary Range - Gross per annum: £43000.00 - £46000.00

Posting Date: 27/03/2017

Introduction

Haran Solutions Limited is one of UK's rapidly growing business consulting companies specialising in providing consulting and business solutions to industry and public sector enterprises across UK.

Currently we are looking for a software developer that possesses extensive knowledge of the PEGA Systems, technology consulting, enterprise and solutions architecture for our UK operations.

Key Responsibilities

As a Senior PEGA Developer, you will assist with the development, delivery and management of technology-based business solutions.

- To work on coding, testing and implementing configuration changes
- To assist in the design of software applications to meet both functional and technical requirements or provide project management support
- To understand end to end business process and develop innovative solutions to meet the needs of the business of today and future needs
- Direct the creation of reusable technology components within ESI's enterprise architecture
- Perform financial assessments of platform changes and enhancements
- To ensure that technical software development process is followed on the project, familiar with industry best practices for software development
- Responsible for modifications and managing of the full life cycle software development process.
- Responsible for implementing PEGA applications, integrations to other applications and systems.
- To participate in the development of business strategy
- To implement PEGA integration services using REST, SOAP, and Email
- To implement user interfaces using Sections, Repeating Grids, Navigation rules, SOAP Services, Harness and HTML stream rules

Essential Experience

- Experience with process methodology, development methodologies (Agile, SDLC, Iterative)
- Experience designing and developing process based solutions or BPM (business process management)
- Experience in various rules and features like Flows, Activities, User Interface, Flow Actions, Agents, SLA, Correspondence, Single-Sign-On, External Authentication, PRPC Security, Reports, Listeners (File, MQ), Connectors and SOAP Services
- Experience in full PRPC implementation cycle including enterprise Class Structure design and Rulesets design
- Experience with RDBMS specifically Oracle, but also DB2, Sybase, and/or MS SQL
- Application Security concepts, Integration and their error handling
- Understanding of OOP concepts. Experience with Java, JavaScript, CSS3, HTML5, Pega Case Management

Desired Experience

- Ability to handle multiple projects and tasks simultaneously and prioritise tasks effectively
- Quick learner who has a passion for new technology and frameworks.
- Possess one of the following certifications: CSA (Certified System Architect), CSSA (Certified Senior System Architect), LSA (Lead System Architect) CPBA (Certified Pega Business Architect).
- Knowledge of software architecture and SOA services implementation

Skill Sets Required

- Candidate should be ready to deliver high quality outputs in tight timelines
- Experience in using and building PRPC frameworks for reuse, using Pega Connectors & Services for integration, PRPC tools PAL, Tracer, Security Model, Access Groups, UI Portals, Log Analyzer, PRPC Multi-node architecture and caching
- Experience in PRPC configuration and customization
- Working knowledge of Oracle database
- Inter-Personal Skills – You should have demonstrable communication skills, problem-solving and “can-do” attitude.

- Team player with demonstrative ability to multi task under tight time constraints and with strict confidentiality guidelines

Education Level / Qualifications

- Bachelor's Degree
- Master's Degree – Preferred

Travel - Occasionally within UK
