

Role: Web Design Consultant

Reference: HSL/WDC/05102016

Salary: Salary Range - Gross per annum: £21,000 - £22,000

Introduction

Haran Solutions is one of UK's rapidly growing business consulting companies specialising in providing consulting and business solutions to industry and public sector enterprises across UK.

Currently we are looking for a web design consultant to join solution team to design new solutions to improve business efficiency and productivity for our UK operations.

Key Responsibilities

- You must actively collaborate with the team in ongoing product development, including design, development, review, integration, test, and deployment activities to deliver the most user friendly web applications to serve the needs of our clients.
- Develop new features and web applications based on the agreed needs and priorities including delivery of agreed and assigned innovations and fixes to deadline and quality.
- You should be comfortable in a fast-paced development environment that continually embraces the latest technologies and techniques.
- Solve complex problems, involving broad product knowledge or functional specialty.
- Use of different tools to integrate with various services and develop custom customer solutions.

Essential Experience

- Strong Experience in creating and interfacing with SOAP/WSDL/XML/REST web services
- Knowledge of Servers and Configuration - Apache, Weblogic
- Experience in building or supporting web applications with JavaScript, HTML and AJAX.
- Experience in Java web applications.
- Strong Database Skills (Oracle/MySQL)

Desired Experience

A web designer/developer should:

- Have skills in software programming and graphics
- Have creativity and imagination
- Be adaptable and able to pick up new techniques
- Have good interpersonal and communication skills
- Be able to work on their own or in a team
- Be able to work to tight deadlines
- Be thorough and precise in their work
- Be able to multi-task
- Be aware of international web standards and protocols
- Be able to use their initiative

Skill Sets Required

- Development experience with HTML, JavaScript, AJAX, jQuery, and Cascading Style Sheets (CSS)
- Adaptable and keen to learn new technologies
- Knowledge of PHP would be a definite bonus
- An extensive portfolio which demonstrates your professional experience with responsive design, typography, UX/UI design and your creativity
- Candidate should have excellent communication (written and verbal) and client engagement
- Candidate should have proven experience to deliver high quality outputs within timelines
- Reasoning skills, patience and keen observation

Education Level / Qualifications

- Bachelor's Degree in Computer Science
- Master's Degree in Computer Science – Preferred

Travel - Occasionally within UK and abroad

Closing Date: 21st Oct 2016
