

**Role:** Robotic Process Automation (RPA) Developer

**Reference:** HSL/RPAD/04012018

**Salary:** £43,000 to £49,000

**Posting Date:** 04/01/2018

### **Introduction**

Haran Solutions Limited is one of UK's rapidly growing business consulting companies. The company philosophy is to deliver high quality and robust systems in tight timelines with success being measured by safe, sustained and high-quality delivery. We believe to work in a congenial and proactive environment where constant knowledge sharing provides the opportunity for significant learning and skill-set development.

Currently we are looking for a RPA Developer for our UK operations.

### **Key Responsibilities**

As a RPA Developer, you will be given an understanding of the company's IT products and services. This role utilizes RPA technology, to support business strategies and improve business processes by delivering process automation solution that meet or exceed enterprise quality.

As a technology evangelist, we expect you to cover the following responsibilities:

- The role will be to participate in hands on development, configuration and testing of process automation (RPA) to meet the defined requirements
- Design and develop process automation using core RPA workflow principles that are efficient, well structured, documented, maintainable and easy to understand
- Should have deep technical skills in Process Automation and be capable of serving as a subject matter expert in RPA using UiPath/ Blue Prism
- Process Automation monitoring and troubleshooting, status reporting, testing and issue resolution across all the phases
- Responsible for RPA architecture and RPA technology administration functions. Provide training to offshore or other teams in automation process and technology
- Strives to embrace diverse ideas, best practice, and industry trends from a variety of sources (internal and external) to create quality solutions, products, and services
- Take responsibility for project activities including work estimation, planning, stakeholder management and project quality
- Identify opportunities to reduce total cost of ownership in the operational application support areas
- Work across the organization to provide business process or design recommendations consistent with long term business and IT strategy
- Attention to detail and ability to manage multiple priorities in a fast-paced environment
- Assists with pilots for Business automation tool upgrades, innovative tool evaluations, and configuration of new automation tools

### **Skill Set Required**

- **Programming environments** –You will have demonstrable experience of using C# and working knowledge of VB
- **Working environment** – You will be comfortable attacking complex challenges in many ways, as a team member
- **Domain** – UK wealth management, banking/insurance services
- **Quality and security** – You will understand, respect and reinforce the importance of quality in the product development process. You will have demonstrable experience of using your initiative to improve the quality, robustness and accuracy of deliverables
- **Inter-Personal Skills** – You should have demonstrable communication skills, problem-solving and “can-do” attitude

### **Essential Experience**

- Proven experience in R&CA technologies such as Blue Prism, UiPath, Automation Anywhere and WorkFusion
- .NET (C#) and .NET framework application development experience
- Scripting language (JS/ VBS/ JavaScript) experience
- Proven experience in Java / .NET (C#, VB, etc.)/ VBA / HTML/ SQL) or similar
- Ability to analyse, understand business problems and document in a detailed design document
- Proficiency in MS Office (Access, Outlook, Excel, PowerPoint) including macros creation MS Excel, Power Pivot, C# programming, Scripting Languages (Python/Perl/Shell)
- Testing Tools - Bugzilla, DTS, HP-Quality Centre
- Strong experience in software delivery using Agile methodology
- A strong understanding of other development lifecycles
- Excellent oral and written communication skills

### **Desired Experience**

- Understanding of basic object-oriented concepts
- Should have used an IDE (e.g. Visual studio, WebSphere etc.)
- Experience of software development projects, particularly automation projects is highly preferred
- Experience of application development and test automation
- Demonstrate skills in shaping and leading development of technical specifications
- Demonstrate advanced business and technical acumen for applications
- Certification in industry leading Robotics Process Automation Products
- Experience in RPA projects within Financial services

### **Education Qualifications**

- Bachelor’s Degree in Engineering, Computer Science or other related degree
- Blue Prism developer accreditation preferred

**Travel** - Occasionally within UK

**Last date to apply:** 03rd February 2018
